

GCS: GETCHA Scraper

작성자: Hyewon Shin (FG-AP-52), 마지막 업데이트: 25 6월 2025 • 3분 읽기

Target date	2025. 5. 31
Requestor	@알 수 없는 사용자 (qte8936)
User Story	 KRITMNGT-4839 - GCS: Getcha Scraper IN PROGRESS 
Document status	DRAFT
Document owner	@Hyewon Shin (FG-AP-52)
Developers	@Hyewon Shin (FG-AP-52)
Business User	@Gayoung Ryu (C3-KR-V-1)

Webpage

<https://gcs.bmwkr.ap-northeast-2.aws.cloud.bmw/>
Can be accessed within BMW Network.

Goals

- This system is a Python-based web scraper that automatically collects discount information for imported car brands from the GETCHA website (mobile) and saves the data as an Excel file.
- Thereby replacing manul data gathering and ennhanche business efficiency.

Background and Strategic Fit

- Existing GETCHA scraping tool has been outdated due to GETCHA website renewal.

- Autmoation system for daily monitoring of BMW's discount rates to ensure price stability.
- Previous human scraping was done **twice a month**, at the beginning and end of each month. Each time it took **at least half a day, often a full day**, making it quite a draining job with a possibility of human error.
- Daily monitoring of competitors (MR) discount rates to track competitors price strategy/competitiveness

Key Features

- Brand Series Exploration - Automatically browses each car brand's model series with discounts
- Model Discount Collection - Retrieves MSRP, cash discounts, and finance discounts
- Fuel Type and Year Detection - Extracts fuel type (P, D, BEV, PHEV) and model year
- Duplicate Data Prevention - Avoids collecting the same series data multiple times per day
- Excel File Output - Saves data daily as `car_data_YYYYMMDD.xlsx`
- Logging & Exception Handling - Writes logs and warnings to `scraping.log` for tracking

Expected Benefits

- Daily automated data collection
- Minimized human errors and data omissions
- Real-time competitive insight for Marketing/Strategy teams
- Stable, scalable system without manual intervention

Scope of Data Collection

- Brands Covered: BMW, Mini, Mercedes-Benz, Audi, Volkswagen
- Data Fields: Scraped Date, Model Name, Model Series, Model Year, Fuel Type, MSRP (Manufacturer's Suggested Retail Price), Cash Discount, Finance Discount

Tech Stack

- Python 3.11
- Playwright (async browser automation)
- BeautifulSoup (HTML parsing)
- pandas (data handling and Excel export)
- openpyxl (Excel writing engine)
- Flask

Future Improvements

Deploy the system to a shared server (NSCKR Cloud Shared Service Sandbox)

Implement data integrity checks by cross-validating with GETCHA website. (Scraping code currently works on GETCHA Mobile)

Lambda Migration

Integrate with MCP for automated code maintenance and lifecycle manangement.

Requirements

#	Title	Importance	Done
1	Web scaping is designed to ensure full compliance with applicable local legal and regulatory frameworks	Must Have	O
2	End-User Training		O
3	Regularly accomodate to changes in website structure		

User Requirements and Interaction

- NSCKR Github Access - Licence owned by FG-AP-52

Questions

Below is a list of questions to be addressed as a result of this requirements document:
